### Description

Thinking of Place III is a collaborative print project with 4-6 artists from each of 16 international printmaking groups. Artists were invited to create new works that invoke a legend, myth, story or an aspect of ancestral heritage in relation to their personal identification with locality and environment for this project. 86 prints from Argentina, Australia, Canada, Denmark, Guam, Ireland, New Zealand, Poland, Serbia, Turkey, United Kingdom and United States of America therefore present us with individual responses to both shared cultural legacies and specific associations with place, including concepts of land, colonisation and collective memories that adhere to places.

Thinking of Place iii at The University Gallery in Kragujevac, Serbia, is the 7th presentation of this cultural exchange. There will be an official opening of the exhibition and guided tours for students and other interested parties (dates to be announced).

Works in a diverse range of print media, 28x38/38x28cm in size, are documented in a catalogue which accompanies the exhibition. A link to pdf version can be found here:
